lamininindustries.com

REVEL 2119 - Vinyl Tape Line Striping is used as a stencil system or print for single/multi colored logos and designs.

APPLICATIONS

Revel 2119 - Vinyl Tape Line Striping is used primarily for temporary application on polished concrete or other smooth surfaces, for the use of applying a variety of artistic mediums. Most commonly used mediums include Solvent & Water-Based Dyes, Acid Stains, Topical Coatings, Paints and Etching Solutions. (Please do NOT use with substances like Xylene and MEK.)

COMPOSITION

Revel 2119 - Vinyl Tape Line Striping is a 3.4 mil white vinyl with pressure-sensitive adhesive backing. This material is capable of producing details as small as 1/8" while preventing bleeding.

MATERIAL THICKNESS

Approx. 3.4 mil

MINIMUM APPLICATION TEMPERATURE

40 Degrees Fahrenheit (4 Degrees Celsius)

WATER RESISTANCE

Fair. Immersion in water is not recommended.

HUMIDITY RESISTANCE

Poor

SOLVENT RESISTANCE

Excellent

STORAGE

Do not allow material to be exposed to direct sunlight for extended periods of time. Remove vinyl design from packaging, and lay flat in a temperature controlled environment prior to installation.

Because application techniques, environmental & surface conditions vary, we cannot guarantee how the stencil design will perform under every circumstance. For this reason small 1 'xl' samples will be given upon request for testing purposes, you only pay for shipping. Custom sample requests of the above material will be charged at a discounted rate. (Not to exceed 2' x 2').

Information provided here is based on research and is believed to be reliable as of printing date. The information does not constitute a warranty. All material should be tested by purchaser to determine final suitability. Laminin Industries will not be held responsible for customers end use of product. Laminin is available for directions and advice as to proper use and application of our products. Contact your Laminin sales representative for pricing.
