

PRODUCT DESCRIPTION

Laminin Industries' Spill Transformer is a proprietary blend designed to absorb numerous types of industrial, automotive and household liquids. Spill Transformer is fast acting, easy to use and environmentally friendly. Spill Transformer makes nearly any spill TRANSFORM into a semi-solid mass that can easily be swept up or vacuumed.

KEY FEATURES and BENEFITS

Absorbs the following materials for quick, easy cleanup:

- * Acrylic Paint
- * New and Used Motor Oil
- * Gasoline
- * Urine
- * Vomit
- * Oil Varnish
- * Water
- * Hydraulic Oil
- * Solvents
- * Urethane Paint
- * Blood
- * Coffee

ABSORPTION RATE

Oil Absorption Rate - 118%

Water Absorption Rate - <150%

DIRECTIONS FOR USE

Spread Spill Transformer around the edge of the spill to contain and continue to cover the entire spill with a layer of Spill Transformer. Allow Spill Transformer to absorb any and all liquid. Agitation of Spill Transformer and liquid can speed up the absorption process for quicker cleanup. For larger spills, additional Spill Transformer may be required. Once absorbed, spill can be collected and disposed of easily. Dispose of petroleum based spills according to local regulations.
